TRUSTORY

Life with Azula would be far different if it weren't for Trupanion. She is one of those dogs who falls into the 1% category with constant and rare issues. From eating a tennis ball or a squeaky toy to ripping off her dewclaw nail, she always keeps me on my toes. Lucky for me, Trupanion covers all of her issues at 90%, with no payout limits! Thank goodness I have a \$0 deductible as well because every time she sees the veterinarian it's due to more than one issue, usually unrelated to the last. I probably wouldn't be able to afford to take such good care of Azula without Trupanion.
